Hi Bernardine,

We don't have any reports, I was hoping that there were jpg's of the hazmat, debris collection sites, etc. that were generated by TCEQ that we could use.

Regards,

Doug-

Doug,

If the reports have geocoded information or a physical address, I could see about getting them mapped in CAMEO if that would be helpful. By the way, how many are there?

Thanks,

Bernardine Zimmerman

Doug, I just sent you the list of release reports we have received from the NRC to date... hope that helps...

With Regards, Steve

Subject: Need assistance on Hazardous Material Overlays-PDF Materials to send to our OSHA Field Opns Offices

Bernadine,

Good Morning,

I called and talked to Steve this morning.

I'm here at the FEMA JFO in Austin, and I was just wondering if you are at the TCEQ that's located at the Parmer Road Exit, off I-35 here in Austin.

We are really needing to gain some situational awareness on hazardous material sites for our Strike Teams when they go out.

We currently have 3 Field Operations Offices (Corpus Christi/Houston North/Houston South). Each one of these staffed at 4 Teams X 2 Specialties [1 safety and 1 industrial hygienist]

Looking at plans to put another Field Office down in Beaumont, at the Texas OSHCON facility located there, in the near future.

The GIS Cell here at JFO has no useable graphics regarding oil, spill, hazmat sites, air quality index, etc. – they are working at a 10% staffing level, and have sent out folks to support Irma.

I do not have Cameo / Marplot here - it would really help if you by chance, have some PDF maps/overlays with the above info on them, so I can send to our Field Offices.

If better to call me, my Cell # 254-368-1461- this is my cell that I carry all the time.

For future reference, we just received a "OSHA JFO Cell Phone" and that number is 202-578-2934 –

This will be the Cell # to call to reach the OSHA JFO Liaison working down here in Austin - Marianne McGee and I will rotate out around September 15th or so, and I'll probably be at our Regional Office, then Houston, Texas, most likely after that.

I appreciate any assistance you can provide!
